AI SEARCH · DENTAL CLINICS

ASK CHATGPT FOR A DENTIST.

AI SEARCH, EXPLAINED.

Some patients now ask AI tools where to go. Does your clinic come up?

SWIPE →

THE PROBLEM

AI CAN ONLY RECOMMEND WHAT IT CAN READ ABOUT YOU.

Tools like ChatGPT, Gemini and Google's AI Overviews build answers from what's written online. If your clinic's details are thin or messy, the answer names someone else.

THIN	MESSY	FEW
WEBSITE	DETAILS	MENTIONS

1

STEP 1 OF 5

ANSWER REAL QUESTIONS.

Write clear answers to what patients ask: cost, pain, time, aftercare.

BEFORE	AFTER
Short service list	'How much are implants?'
No FAQs	'Does it hurt?'
Vague text	Clear, honest answers

2

STEP 2 OF 5

SAME DETAILS EVERYWHERE.

Name, address, phone and treatments should match on every site.

BEFORE	AFTER
Old address online	One clinic name
Different names	Same address and phone
Mixed info	Same treatment list

3

STEP 3 OF 5

GET DESCRIBED IN REVIEWS.

Reviews where patients describe their visit help people and AI understand you.

BEFORE	AFTER
Few reviews	Steady new reviews
'Good' with no detail	Patients describe the visit
Old reviews	Never written for them

SWIPE →

4 STEP 4 OF 5

BE MENTIONED ON TRUSTED SITES.

Local press, dental associations and directories all count.

WHERE TO BE MENTIONED	KAALA
Directories	UP TO DATE
Associations	MEMBER LISTING
Local press	NEWS AND EVENTS
Google profile	COMPLETE

SWIPE →

5

STEP 5 OF 5

CHECK WHAT AI SAYS.

Once a month, ask AI tools about dentists in your town. See what comes up.

BEFORE	AFTER
Never checked	Monthly check
No idea	Fix wrong details
Wrong info out there	Track your progress
